National Center for Health Statistics

Hyattsville, Maryland
May 1981

The data compilation and documentation necessary for the Ophthalmology Data Tape were done by Michael Rowland, Jean Roberts, Everette Collins, Kurt Maurer, Evelyn S. Stanton and Mary Dudley of the Division of Health Examination Statistics, National Center for Health Statistics. A special note of gratitude is due Eugene Sides who patiently typed and retyped this material.

OPHTHALMOLOGY DATA TAPE

Health and Nutrition Examination Survey, HANES I, 1971-1975

Description of Survey: A detailed description of the design, content and operation of HANES I is provided in the following reports: Plan and Operation of the Health and Nutrition Examination Survey, DHEW Pub. No. (HSM) 73-1310, Series 1, Nos. 10a and 10b, Public Health Service, Washington, D. C., U. S. Government Printing Office, February 1973. Also provided is a draft report on the augmentation survey of adults describing the relevant field work conducted between July 1974 and October 1975.

Target Population: HANES I was conducted on a nationwide probability sample of approximately 28,000 persons, ages 1-74 years, from the civilian, noninstitutionalized population of the coterminous United States, excepting those persons residing on Indian reservations. The survey started in April 1971 and for many survey components was completed in June 1974. The HANES I sample was selected so that certain population groups thought to be at high risk of malnutrition (persons with low incomes, preschool children, women of childbearing age and the elderly) were oversampled at known rates. Adjusted sampling weights were then computed within 60 age, sex and race categories in order to inflate the sample in such a manner as to closely reflect the noninstitutionalized population, ages 1-74 years, of the United States at the mid-point of the survey.

Although the main emphasis of HANES I was on nutrition, a subset of those sample persons aged 25-74 received a more detailed health examination which was continued through October 1975. No particular oversampling of subgroups of the population was done in this subsample (e.g., women of childbearing age were not oversampled as they were for the major nutrition component of HANES I). This subsample is also representative of the United States population aged 25-74 during the time of HANES I.

After the nutrition survey was completed, the detailed examination given to the 25-74 age group was continued until the total number of examined persons was approximately double the number of examinees who received the detailed examination during the nutrition survey.

In order to produce national estimates of the nutritional status of the U. S. population at an earlier date, a probability subsample of 35 stands of the 65 stands was selected. This 35-stand subsample also made it possible to produce national estimates of certain other aspects of health status in the population that were critically needed at an earlier date and examination components that for logistic reasons could not be continued for the remainder of the 65 stands. Included among the 35 stands were 10 of the 15 large certainty metropolitan areas and 1 stand from each of the 25 noncertainty superstrata. The reduction from 15 to 10 large metropolitan areas was accomplished by randomly selecting one stand from multiple-stand standard metropolitan statistical areas; e.g., selecting the southern half of the Chicago

SMSA to represent the entire SMSA. (This selection procedure was based on operational considerations, and although unbiased, is recognized as not being statistically optimal.) It is this subsample of 35 stands upon which the findings documented here are based. Altogether, 10,127 persons were examined during the period from April 1971 to October 1972.

Data Collection: Information for all examined sample persons in HANES I was obtained by means of a household interview, a general medical history, a 24-hour dietary intake recall interview, a food frequency interview, a food program questionnaire, a general medical examination, dental, dermatological and ophthalmological examinations, anthropometric measurement, hand-wrist x-rays (of those ages 1-17 only) and 24 hematological, blood chemistry, and urological laboratory determinations.

In addition to the information received on all examined persons by means of the above questionnaires, procedures and measurements, the following data were gathered on the subsample of adults aged 25-74: a medical history supplement; supplementary questionnaires concerning arthritis, respiratory and cardiovascular conditions (when applicable); a health care needs questionnaire; a general well-being questionnaire; an extended medical examination; x-rays of the chest and hip and knee joints; audiometry; electrocardiography; goniometry; spirometry; pulmonary diffusion and tuberculin tests; along with additional laboratory determinations.

Use of HANES Data

With the goal of mutual benefit, NCHS requests the cooperation of recipients of data tapes in certain actions related to their use:

- A. Any published material derived from the data should acknowledge the National Center for Health Statistics as the original source. It should include also a disclaimer which credits any analyses, interpretations, or conclusions reached to the author (recipient of the tape) and not to NCHS, which is responsible only for the initial data.
- B. Consumers who wish to publish a technical description of the data will make a reasonable effort to insure that the description is not inconsistent with that published by NCHS. This does not mean, however, that NCHS will review such descriptions.

Errors in the Data Sets and Survey Differences

The data users tapes have been subjected to a great deal of careful editing. However, due to the large volume of data in the series, it is likely that a small number of errors or discrepancies remain undetected. We would appreciate if any such errors are detected that they be brought to our attention so that new corrected copies of the tape can be created and errata sheets issued to previous purchasers.

Some of the continuous data items have extremely high or low values and we have verified that they do in fact appear that way on the hard documents; that is, we have verified that the values have not been incorrectly keyed.

In general, we have not attempted to resolve any differences that may exist between estimates derived from the various subsamples of HANES I. Nor have we made any comparisons between estimates from HANES I and previous surveys conducted by the Division of Health Examination Statistics.

Variance Estimation

Because the Health and Nutrition Examination Survey is based upon a complex sample design, the assumptions of many statistical tests and routinely available statistical programs are not met. For this reason, when estimates of the variances of statistics from HANES are computed, the technique of estimation must be based upon complex sampling theory. In order to provide the user with the capability of estimating the complex sample variances, we have provided Strata and Primary Sampling Unit (PSU) codes on the HANES user tapes in tape positions 194-198. However, these codes are suitable for making variance estimates only for examination locations 1-65 and 1-100. To compute variance estimates for examination locations 1-35 or 66-100, it is necessary to recode the current Strata-PSU codes according to the specifications that follow. The resultant recoded Strata-PSU codes should be used only for locations 1-35 and 66-100.

One computer program that should be widely available sometime around the summer of 1978 as part of the Statistical Analysis System (available from the SAS Institute, Inc., Post Office Box 10066, Raleigh, North Carolina 27605) is capable of using the Strata-PSU codes provided for HANES to compute complex sample variances. Other programs may also be available.

In those Strata, referred to as certainty or self-representing Strata, the PSU codes are actually the segment numbers. Neither the Strata codes nor the PSU codes are the original codes used in the formation of the HANES sample design, but are none-the-less a unique recoding of the original codes. For further discussion of the sample design of HANES, the user should consult the publications of the National Center for Health Statistics-- Series 1-Nos. 10a and 14 and the detailed note for tape positions 158-193.

Recode Specifications for Strata-PSU Codes

First.--Create a file with only those records in the file for examination locations 1-35.*

Second.--Retain the original Strata-PSU codes in Strata 7-10 and 13 in the original form as the recoded Strata-PSU codes.

Third.--Recode the remaining strata according to the chart below.

Fourth.--Repeat the process for examination locations 66-100.*

TAPE CHARACTERISTICS

Title: Ophthalmology Tape

Catalog Number: 4161

Data Set Name: HEHANESI.DU416104

Record Length: 650

Blocksize: 3900

Number of Records: 10127

Number of Reels: 1

Recording Mode: Fixed Block, EBCDIC

Channel: 9 Track

Created by: Division of Health Examination Statistics
National Center for Health Statistics
Hyattsville, Maryland

General Notes

Asterisks on the Tape Description: Some of the data items were obtained only for a particular subsample of HANES. Consequently some of these items appear to have a great deal of missing data (coded as BLANK) due to nonresponse, but in fact the data are missing because the design of HANES dictated that the item was to be obtained only for a particular subsample. (For further discussion of the various subsamples in HANES the user should see the detailed note for tape positions 158-193.)

To alert the user to this fact asterisks were put on the tape description. One asterisk denotes that the data item was obtained only on examinees receiving the detailed examination.

Demographic Information: An advance letter, announcing the forthcoming arrival of an interviewer from the U. S. Bureau of the Census, was mailed to each household that fell into the sample area. The interviewer subsequently visited the household to ascertain its composition and to administer a questionnaire, the primary purpose of which was to obtain demographic information. The questionnaire was administered to each potential sample person that was available and competent enough to respond to questions. In the event that a potential sample person was not at home at the time of interview, any responsible adult in the household was asked to respond to the questions for the absent person.

Demographic information for each of the examinees appears in tape positions 1-200.

Ophthalmology Examination:

Examinees 1-74 years of age were given an examination which included the taking of an ocular history regarding previously known eye disorders or previous eye surgery and an examination for motility defects. The standardized eye examination for those over 3 years of age included a determination of monocular distance visual acuity with usual correction, if any, and a pinhole test to determine correctability for those with acuity less than 20/20; prescription of present glasses; dilation, and within 20-70 minutes following dilation retinoscopy for detailed examinees 25-74 years with acuity less than 20/40 and spherical trial lens test for nutrition examinees with acuity less than 20/40; applanation tonometry on examinees 20 years and older; and examination of the pupils, lids, globes, conjunctiva, sclera, corneas, anterior chambers, irises, and lenses. The pupils were dilated in most instances for the spherical refraction and retinoscopy and for the examination of the vitreous and retina.

Other Vision Data: Physical examination data relating to the eyes can be found in tape locations 239-245 of the General Medical Examination, 1-74 years (catalogue number 4233). Certain vision-related questions can be found on the Medical History Questionnaire, 1-11 years (catalogue number 4067) and also on the Medical History Questionnaire, 12-74 years (catalogue number 4081).

Monocular visual acuity findings related to selected demographic characteristics are presented in the following publication of the National Center for Health Statistics: Monocular Visual Acuity of Persons 4-74 Years, United States, 1971-72. Vital and Health Statistics. PHS Pub. No. 1000 - Series 11, No. 201. Public Health Service. Washington, D. C. U. S. Government Printing Office, March 1977.

Refraction status, refraction potential, motility defects and medical history findings related to selected demographic characteristics are presented in the following publication of the National Center for Health Statistics: Refraction Status and Motility Defects of Persons 4-74 Years, United States, 1971-72. Vital and Health Statistics. PHS Pub. No. 1000 - Series 11, No. 206. Public Health Service. Washington, D. C. U. S. Government Printing Office, 1978.

DEMOGRAPHIC DATA SUMMARY - HANES I

	<u>Tape Positions</u>
Sample sequence number	1
Size of place	10
SMSA-not SMSA	11
Type of living quarters	12
Land usage	13
 If rural, asked - How many acres of land are included	 14
If 10 acres or more asked - Sale of crops, etc. amount to \$50 or more ..	15
If 10 acres or less asked - Sale of crops, etc. amount to \$250 or more .	16
Age - head of household	17
Sex - head of household	19
 Highest grade attended - "head of household	 20
Race - head of household	22
Total number of persons in household	23
Total sample persons in household	25
Number of rooms in house	27
 Is there piped water	 28
If yes, is there hot and cold piped water	29
If yes to piped water - Does house have a sink with piped water	30
Does house have a range or cook stove	31
Does house have a refrigerator.....	32
 Are kitchen facilities used by anyone not living in household	 33
Total family income group	34
 NOTE: The following income questions were asked <u>only</u> if "Total Family Income" was less than \$7,000	
 During Past Year Did you or Any Members of Your Family Receive Money From:	
Wages or salaries	36
If yes - How much altogether before deductions	37
Social Security or Railroad Retirement	41
If yes - How much altogether	42
Welfare payments or other public assistance	46
 If yes - How much altogether	 47
Unemployment or Workman's Compensation	51
If yes - How much altogether	52
Government employee pensions or private pensions	56
If yes - How much altogether	57

Tape
Positions

Dividends, interest or rent	61
If yes - How much altogether	62
Net income from own non-farm business, professional practice or partnership	66
If yes - How much altogether	67
Net income from a farm	71
 If yes - How much altogether	72
Veteran's payments	76
If yes - How much altogether	77
Alimony, child support or contributions from persons not living in household	81
If yes - How much altogether	82
 Any other income	86
If yes - How much altogether	87
Total amount	91
Family unit code	95
Relationship to head of household	100
 Age at interview	101
Race of examined person	103
Sex of examined person	104
Marital status	105
Date of birth (month and year)	106
 Place of birth	110
Highest grade of regular school ever attended	112
Did he finish the grade	114
Is he attending school now	115
Has he ever attended a school of any kind	116
 If yes - What kind of school	117
Is any language other than English frequently spoken in the household .	118
If yes - What language	119
What is your main ancestry or national origin	120
What was he doing most of past three months	122
 If "something else" - What was he doing	123
If "keeping house" or "something else" - Did he work at a job or business at any time during the past three months	124
If "working" - Did he work full-time or part-time	125
Did he work at any time last week or the week before (not around house)	126
If no - Even though he did not work during that time, does he have a job or business	127

Tape
Positions

Was he looking for work or on lay-off from a job	128
If yes - Which	129
Class of worker	130
If self-employed in "own" business and not a farm, is the business incorporated	131
Business or industry code	132
Occupation code	135
Date of examination	138
Age at examination	144
Farm/non-farm	146
Poverty index	147
Region	150
SAMPLE WEIGHTS	158
STRATA - Primary Sampling Unit	194

DETAILED NOTES

TAPE POSITION 10

Size of Place

Size of place classification was derived from the 1960 census. According to the definition used in the 1960 census, the urban population was comprised of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages and towns (except towns in New York, New England, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (c) towns in New England and townships in New Jersey and Pennsylvania which contained no incorporated municipalities as subdivisions and had either 2,500 inhabitants or more, or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in states other than the New England states, New Jersey, and Pennsylvania, that had no incorporated municipalities within their boundaries and had a density of 1,500 persons per square mile; and (e) unincorporated places of 2,500 inhabitants or more not included in any urban fringe. The remaining population was classified as rural.

Urban areas are further classified by population size for places within urbanized areas and other places outside urbanized areas.

DETAILED NOTES

TAPE POSITION 11

SMSA

A standard metropolitan statistical area is basically a county or a group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to the 1960 Census, they are socially and economically integrated with the central city. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities.

DETAILED NOTES

TAPE POSITIONS 22 AND 103

Race

The race of the respondent was marked by observation and it was assumed the race of all related persons was the same as the respondent unless otherwise learned. The race categories were "White", "Negro" or "other." If the appropriate category could not be marked by observation, then race was asked. Persons of races other than White or Negro, such as Japanese, Chinese, American Indian, Korean, Hindu, Eskimo, etc. were reported as "Other." Mexicans were included with "White" unless definitely known to be American Indian or of other nonwhite race.

DETAILED NOTES
TAPE POSITIONS 34-35

Total Family Income Group

The income group represents the total combined family income for the past twelve (12) months. It includes income from all sources such as wages, salaries, social security or retirement benefits, help from relatives, rent from property and so forth. The income groups were not reconciled to the component parts (tape positions 36-94). The income component parts were not asked when the gross income was greater than \$6,999 per annum. However, amounts greater than \$6,999 appear in tape positions 37-40, 67-70, and 72-75. Some respondents reported a loss of income from their nonfarm business, professional practice, partnership or farm and this explains why some data fields are greater than \$6,999, but the individual total in tape positions 91-94 does not exceed this figure.

DETAILED NOTES

TAPE POSITIONS 95-99

Family Unit Code

All related sample persons in the same family unit have the same computer generated family unit code. This will enable detailed analysis of the individual family unit.

DETAILED NOTES

TAPE POSITIONS 132-134 AND 135-137

Industry and Occupation Codes

A person's occupation may be defined as his principal job or business. For this survey purpose, the principal job or business of a respondent is defined in one of the following ways: If the person worked during the two week interview period or had a job or business, the question concerning his occupation (or work) applies to his job during that period. If the respondent held more than one job, the question is directed to the one at which he spent the most time. It refers to the one he considers most important when equal time is spent at each job. A person who has not begun work at a new job, is looking for work, or is on layoff from work is questioned about his last full-time civilian job. A full-time job is defined as one at which the person spent 35 or more hours per week and which lasted two consecutive weeks or more. A person who has a job to which he has not yet reported and has never had a previous job or business is classified as a "new worker."

The 1970 census of population Alphabetical Index of Industries and Occupations was used in the coding of both the industry and occupation.

Library of Congress Number 74-612012. For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. \$3.00. Stock Number 0301-2283.

DETAILED NOTES

TAPE POSITION 146

Land used for farming purposes (Code 1 in Tape Position 146) was identified as being rural land (Code 2 in Tape Position 13) consisting of 10 or more acres (Code 1 in Tape Position 14) with crop sales amounting to \$50 or more (Code 2 in Tape Position 15), or rural land (Code 2 in Tape Position 13) consisting of less than 10 acres (Code 2 in Tape Position 14) with crop sales amounting to \$250 or more (Code 3 in Tape Position 16). All Other land is classified as nonfarm (Code 2 in Tape Position 146).

DETAILED NOTES

TAPE POSITIONS 147-149

Poverty Index--Income status was determined by the Poverty Income Ratio (PIR). Poverty statistics published in the Census Bureau reports^{1/} were based on the poverty index developed by the Social Security Administration in 1964. (For a detailed discussion of the SSA poverty standards, see reference 2.) Modifications in the definition of poverty were adopted in 1969.^{3/} The standard data series in poverty for statistical use by all executive departments and establishments has been established.^{4/}

The two components of the PIR are the total income of the household (numerator) and a multiple of the total income necessary to maintain a family with given characteristics on a nutritionally adequate food plan^{3/} (denominator). The dollar value of the denominator of the PIR is constructed from a food plan (economy plan) necessary to maintain minimum recommended daily nutritional requirements. The economy plan is designated by the Department of Agriculture for "emergency or temporary use when funds are low."

For families of three or more persons, the poverty level was set at three times the cost of the economy food plan. For smaller families and persons living alone, the cost of the economy food plan was adjusted by the relatively higher fixed expenses of these smaller households.

The denominator or poverty income cutoff adjusts the family poverty income maintenance requirements by the family size, the sex of the family head, the age of the family head in families with one or two members, and the place of residence (farm, nonfarm). Annual revisions of the poverty income cutoffs are based on the changes in the average cost of living as reflected in the Consumer Price Index.

As shown in the table, the annual income considered to be the poverty level increases as the family size increases. A family with any combination of characteristics and with the same income as shown in the table has been designated as having a PIR or poverty level of 1.0. The same family with twice the income found in the table would have a PIR of 2.0. Ratios of less than 1.0 can be described as "below poverty," ratios greater than or equal to 1.0, as "at or above poverty."

Poverty thresholds are computed on a national basis only. No attempt has been made to adjust these thresholds for regional, State, or other local variation in the cost of living (except for the farm, nonfarm difference). None of the noncash public welfare benefits such as food stamp bonuses or free food commodities are included in the income of the low income families receiving these benefits.

DETAILED NOTES

TAPE POSITION 150

Region

The United States was divided into four broad geographic regions of approximately equal population. Those regions, which deviate somewhat from the groups used by the Bureau of the Census, are as follows:

<u>Region</u>	<u>States Included</u>
Northeast	Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, and Pennsylvania
South	Delaware, Maryland, District of Columbia, West Virginia, Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Arkansas
Midwest	Ohio, Illinois, Indiana, Michigan, Wisconsin, Minnesota, Iowa, Missouri
West	Washington, Oregon, California, Nevada, New Mexico, Arizona, Texas, Oklahoma, Kansas, Nebraska, North Dakota, South Dakota, Idaho, Utah, Colorado, Montana, and Wyoming.

DETAILED NOTES

TAPE POSITIONS 158-193

HANES is a multistage, stratified, probability sample of loose clusters of persons in land-based segments. In addition, HANES is composed of two distinct examination components—a nutrition screening examination (taken by all examinees) and a more detailed examination taken by a pre-selected subsample of all examinees, ages 25-74. For the nutrition screening examination, locations 1-35 and 1-65 constituted national probability samples and for the detailed examination, locations 1-35, 1-65, 66-100 and 1-100 all constitute national probability samples. In other words, HANES is composed of six distinct subsamples of the U.S. population. For a more detailed discussion of the sample design see Series 1, No. 10a.

Since each of these six subsamples is a distinct subsample of the U.S. population, each subsample requires a different set of weights. The weights are based upon the probability of selection into the sample, adjustments for nonresponse and further adjustments to approximate the U.S. noninstitutionalized population as of the midpoint of each subsample.

In order to select all of those examinees in a particular subsample, i.e. received a particular exam component, it is necessary to exclude all examinees with a weight of zero or blank. It is also necessary to exclude all zero or blank weights because that is the only way to differentiate missing data due to nonresponse from data that is missing because the sample design dictated that a particular examinee was not supposed to receive a particular examination component.

It is suggested that any analyses that are desired by the researcher be performed using the greatest number of examinees possible; that is, if the researcher is interested in an exam component of the nutrition screening examination he should use the weight and consequently the data from the 65 location subsample rather than the 35 location subsample. For the detailed examination, the researcher should use the 100 location subsample rather than one of the others. However, some exam components were only done in a particular subsample; for example, only at the first 35 locations. In that case, the researcher has no choice in selecting a particular subsample.

There may be occasions when a researcher may want to make comparisons of estimates obtained from various subsamples. For example, the prevalence of some disease condition as estimated from the first 35 locations could be compared with an estimate based upon locations 66-100. The researcher may also want to formulate hypotheses using one subsample and test those hypotheses using another subsample.

Ophthalmic Disease Code (ODC)

Each code is six digits long, all numerical. Digits 1 and 2 refer to the site of the disease or injury. Digits 3 and 4 refer to the type of disease, injury, or surgical or nonsurgical treatment. Digits 5 and 6 refer to the etiology of disease, agent or injury, nonsurgical or surgical treatment indicator, and postoperative state indicator. A description of the adaptation of the ophthalmic disease code (ODC) for the Health and Nutrition Examination Survey is enclosed. Further information regarding the ODC is available from the National Eye Institute, Office of Biometry and Epidemiology, Building 31, Room 6A-20, 9000 Rockville Pike, Bethesda, Maryland 20014.

523, 532, 541, 550, 559, AND 568

The code of "3" and the corresponding condition code was assigned by the headquarters staff of the National Eye Institute based on a review of the record.

OPHTHALMIC DISEASE CODE ADAPTED FOR HANES (ODCA)

Numerical Listing

This listing contains codes for the diagnostic terms which examiners recorded in the history and diagnosis sections (Sections A and T) of the ophthalmology examinations and their replicates for Stands 1 through 35 of HANES. It also contains terms which the examiners did not record.

CROSS REFERENCES, SITE NOT SPECIFIED

.. .. Cicatrix--See scar
 Crescent or crest, disc--See Conus
 Double vision--See Diplopia
 Detachment, retina, aphakic--See Aphakia and Detachment, retina
 Hypersensitive, Hypersensitivity--See Allergy or specific condition
 Pigment, Pigmentary disturbance--See Pigment, Pigmentary changes of part of eye involved
 .. 29 Adenovirus infection
 .. 4. Injury--See Trauma or specific condition
 .. 51 Sensitivity to drops or ointment--See Allergy to drops or ointment
 .. 98 Operation, Operative procedure, history of--See Postoperative state
 .. 98 Postoperative state, not listed--For missing digits, see the condition for which operation was done. /If operation was for trauma of unspecified type, code both trauma and postoperative state in History, Section A/
 .. 98 Postoperative state, tumor--See Tumor
 .. 98 Scar, surgical--See Postoperative state
 .. 98 Surgery, history of--See Postoperative state
 .. 1. .. Congenital anomaly, defect, malformation--See Anomaly, congenital, or specific condition
 .. 42 .. Dirt in eyes--See Foreign body of part of eye involved
 .. 42 98 Postoperative state, foreign body removal--See Foreign body, removed, of part of eye involved
 .. 43 42 Burn, lime--See Burn, alkali, of part of eye involved
 .. 5. .. Neoplasm--See Tumor or specific condition

 77 67 00 Drusen, disc (colloid bodies) (hyalin bodies)
 77 67 00 Drusen, optic nerve (colloid bodies) (hyalin bodies)
 77 67 00 Hyalin bodies, disc
 77 70 00 Conus, disc (choroidal) (chorioretinal) (peripapillary) (pigment, -ary) (retinal) (temporal)
 77 99 00 Crescent, disc NOS--Refer
 77 99 00 Disease, optic nerve, type specified NEC
 77 99 00 Neovascularization, disc (optic)
 77 99 00 Pigment clump, disc (nasal)

78. NEUROMUSCULAR

78 Hypotropia--See Hypertropia
 78 Paralysis, paresis, extraocular (inferior) (lateral) (left) (medial) (muscle) (oblique) (rectus) (right) (superior)--See Esotropia, exotropia, hypertropia, or strabismus
 78 Palsy--See Paralysis

78 00 00 Paralysis, Paresis, nerve, abducens, facial, oculomotor, trochlear, third, fourth, sixth, or seventh
 --See Paralysis, Paresis, cranial nerve
 78 00 00 Strabismus, external--See Exotropia
 78 00 00 Strabismus, internal--See Esotropia
 78 00 00 Weakness, cranial nerve--See Paralysis, Paresis, cranial nerve
 78 00 97 *Surgery, ptosis--See Ptosis for missing digits
 78 00 98 Postoperative state, ptosis--See Ptosis for missing digits
 78 00 00 Decreased or diminished light reflex
 78 00 00 Disease, neuromuscular NOS
 78 00 00 Muscles, weak
 78 00 00 Orthoptics
 78 00 00 Sluggish light reflex
 78 00 40 Sluggish light reflex, traumatic
 78 00 40 Trauma, neuromuscular NEC or NOS
 78 00 97 *Surgery, neuromuscular NOS
 78 00 98 Postoperative state, neuromuscular NOS
 78 10 00 Anomaly, congenital, neuromuscular NOS
 78 11 00 Nystagmus, congenital (horizontal) (jerk) (pendular) (rotary) (vertical)
 78 12 00 Marcus-Gunn phenomenon with ptosis
 78 12 00 Marcus-Gunn ptosis
 78 12 00 Ptosis, due to cranial nerve paralysis, congenital
 78 12 00 Ptosis in Marcus-Gunn phenomenon
 78 12 00 Ptosis, congenital
 78 13 00 Esotropia, congenital (comitant) (incomitant) (intermittent) (alternating) (with overaction or underaction of oblique)
 78 13 98 Postoperative state, esotropia, congenital
 78 14 00 Exotropia, congenital (comitant) (incomitant) (intermittent) (alternating) (with overaction or underaction of oblique)
 78 14 98 Postoperative state, exotropia, congenital
 78 15 00 Hypertropia, congenital (alternating) (comitant) (incomitant) (intermittent) (in left or right lateral gaze) (vertical)
 78 15 98 Postoperative state, hypertropia, congenital
 78 16 00 Strabismus, congenital
 78 16 98 Postoperative state, strabismus, congenital
 78 18 00 Paralysis, Paresis, cranial nerve, congenital (abducens) (facial) (oculomotor) (trochlear) (third) (fourth) (sixth) (seventh)
 78 19 00 Anomaly, congenital, neuromuscular, type specified NEC
 78 19 00 Duane's syndrome
 78 40 40 Diplopia, due to concussion
 78 40 40 Diplopia, traumatic
 78 42 40 Foreign body, neuromuscular NOS (metallic)
 78 42 49 Foreign body, neuromuscular, retained (metallic)
 78 42 98 Foreign body, neuromuscular, removed (metallic)
 78 44 40 Exotropia, traumatic (incomitant) (intermittent) (alternating) (with overaction or underaction of oblique)
 78 45 40 Exotropia, traumatic (incomitant) (intermittent) (alternating) (with overaction or underaction of oblique)
 78 46 40 Hypertropia, traumatic (alternating) (incomitant) (intermittent) (in left or right lateral gaze) (vertical)
 78 60 00 Nystagmus NOS (fixational) (gaze) (horizontal) (jerk) (pendular) (rotary) (vertical)
 78 60 97 *Surgery, nystagmus
 78 60 98 Postoperative state, nystagmus
 78 61 00 Crossed eye
 78 61 00 Strabismus NOS
 78 61 00 Squint
 78 61 40 Strabismus, traumatic
 78 61 97 *Surgery, strabismus NOS
 78 61 98 Postoperative state, strabismus NOS
 78 62 00 Esotropia (accommodative) (acquired) (alternating) (comitant) (hyperopic) (incomitant) (intermittent) (with overaction or underaction of oblique)
 78 62 00 Turning in of eyes
 78 62 45 Esotropia, secondary to surgery
 78 62 74 Esotropia, due to cerebrovascular accident or stroke
 78 62 97 *Surgery, esotropia
 78 62 98 Postoperative state, esotropia
 78 63 00 Esophoria

78 64 00 Exotropia (acquired) (alternating) (comitant) (fever, due to) (incomitant) (intermittent)
 (with overaction or underaction of oblique)
 78 64 00 Turning out of eyes
 78 64 45 Exotropia, secondary to surgery
 78 64 97 *Surgery, exotropia
 78 64 98 Postoperative state, exotropia
 78 65 00 Exophoria
 78 66 00 Hypertropia (alternating) (comitant) (incomitant) (intermittent) (in left or right lateral gaze) (vertical)
 78 66 45 Hypertropia, due to surgery (in left or right lateral gaze) (secondary) (vertical)
 78 66 58 Hypertropia, due to thyroid disease (in left or right lateral gaze) (vertical)
 78 66 74 Hypertropia, due to cranial nerve paralysis, due to aneurysm
 78 66 97 *Surgery, vertical muscles squint
 78 66 98 Postoperative state, hypertropia
 78 66 98 Postoperative state, vertical muscles squint
 78 67 00 Hyperphoria
 78 68 00 Bell's palsy, causing ptosis
 78 68 00 Ptosis, due to Bell's palsy (acquired)
 78 68 00 Ptosis, senile
 78 68 00 Ptosis, due to cranial nerve paralysis
 78 68 00 Ptosis, acquired
 78 68 00 Ptosis, due to cerebrovascular accident (stroke)
 78 68 40 Ptosis, traumatic, due to cranial nerve paralysis
 78 68 45 Ptosis, secondary to surgery
 78 68 74 Ptosis, due to cranial nerve paralysis, due to aneurysm
 78 69 00 Ptosis NOS
 78 79 00 Amblyopia, strabismic
 78 79 00 Amblyopia, refractive
 78 79 00 Amblyopia, due to anisometropia
 78 79 00 Amblyopia ex anopsia
 78 79 00 Lazy eye
 78 80 00 Ophthalmoplegia, total
 78 81 00 Ophthalmoplegia, internuclear
 78 82 00 Horner's syndrome
 78 82 00 Syndrome, Horner's
 78 83 00 Raeder's syndrome
 78 83 00 Syndrome, Raeder's
 78 84 00 Dyskinesia, lid
 78 85 00 Cerebellum and eye movements
 78 85 00 Movements, eye, and cerebellum
 78 86 00 Labyrinth and nystagmus
 78 86 00 Nystagmus and labyrinth
 78 90 00 Bell's palsy
 78 90 00 Paralysis, Paresis, cranial nerve (abducens) (facial) (oculomotor) (trochlear) (third) (fourth) (sixth) (seventh)
 78 90 40 Paralysis, Paresis, cranial nerve, traumatic (abducens) (facial) (oculomotor) (trochlear) (third) (fourth) (sixth) (seventh)
 78 99 00 Absent light reflex (consensual) (direct)
 78 99 00 Disease, neuromuscular, type specified NEC
 78 99 72 Diplopia, due to multiple sclerosis
 78 99 74 Diplopia, due to cerebrovascular accident
 78 99 74 Diplopia, due to intracranial aneurysm
 78 99 98 Postoperative state, tic douloureux
 78 99 98 Postoperative state, trigeminal neuralgia

99. SITE NOT SPECIFIED

99 00 00 Amaurosis
 99 00 00 Amblyopia NOS
 99 00 00 Blindness NOS
 99 00 00 Cyst, site and type not specified (excretory) (obstructed)

99 00 00 Circulation, impaired, poor, site not specified
 99 00 00 Discharge from eyes. /Code only if causative condition is unknown/
 99 00 00 Diplopia. /Code only if causative condition is unknown/
 99 00 00 Dry eye
 99 00 00 Disease, eye, site and type not specified
 99 00 00 Film, eye (AM) (in) (morning) (on) (over)
 99 00 00 Foreign body sensation
 99 00 00 Itching, eye
 99 00 00 Irritation
 99 00 00 Light, sensitivity to
 99 00 00 NLP (no light perception). /Code only if cause of vision loss is unknown/
 99 00 00 Photophobia
 99 00 00 Pain, eye, site not specified
 99 00 00 Redness, eye (with tearing)
 99 00 00 Skin over eye
 99 00 00 Swelling, eye
 99 00 00 Veil, eye (transient)
 99 00 00 Vision blurred, cloudy, decreased, impaired, nil or poor (associated with heart attack or pregnancy). /Code only if cause of impaired vision is unknown/
 99 00 00 Weak eye
 99 00 10 Infection, eye, site not specified, bacterial, organism not specified
 99 00 19 Staphylococcal infection, eye, site not specified
 99 00 19 Scarlet fever, affecting eye NOS
 99 00 20 Infection, eye, site not specified, viral, virus not specified
 99 00 22 Herpes zoster, site not specified (infection)
 99 00 23 German measles, site and type not specified (noncongenital)
 99 00 30 Infection, eye, site not specified, organism not specified (abscess) (acute) (chronic) (external) (subacute)
 99 00 38 Infection, eye, site not specified, fungal
 99 00 39 Infection, eye, site not specified, organism specified NEC (acute) (chronic) (subacute)
 99 00 40 Black eye
 99 00 40 ED, eye, site not specified
 99 00 40 Blow, eye
 99 00 40 Grease splash
 99 00 40 Scratch, eye
 99 00 40 Trauma, eye, site and type not specified (bullet)
 99 00 40 Ulcer, traumatic
 99 00 41 Liquid plumber, eye, site not specified
 99 00 41 Trauma, eye, site not specified, chemical, nonmedicinal
 99 00 48 Birth injury
 99 00 56 Diabetes, site not specified
 99 00 57 Burning eyes, due to poor diet
 99 00 64 Eclampsia with vision disturbance NOS
 99 00 65 Flood vessel broken, burst, or ruptured behind eye
 99 00 65 Blood clot behind the eye
 99 00 70 Amblyopia, due to fever (from infection)
 99 00 70 Dyslexia
 99 00 70 Pseudotumor cerebri
 99 00 70 Scotoma, due to migraine headache (scintillating)
 99 00 70 Water tumor, brain
 99 00 74 Stroke, causing ocular symptoms
 99 00 74 Vision impaired, due to cerebrovascular accident. /If CVA is reported in Section A, assume ocular impairment unless examiner specifically states there was none/
 99 00 81 Disease, eye, site and type not specified, familial or hereditary
 99 00 81 Familial eye disease
 99 00 81 Hereditary eye disease
 99 00 98 Postoperative state, cyst, site and type not specified
 99 00 98 Postoperative state, eye, site and type not specified
 99 10 00 Anomaly, congenital, eye, site and type not specified
 99 10 00 Amblyopia, congenital
 99 10 00 Blindness since birth
 99 10 00 Disease, eye, site and type not specified, congenital

99 10 00 vision blurred, cloudy, decreased, impaired, nil or poor, since birth
 99 10 12 Syphilis, congenital, site not specified
 99 10 23 Anomaly, congenital, eye, site and type not specified, due to rubella
 99 10 23 Rubella syndrome, site and type of eye anomaly not specified (congenital)
 99 10 30 Infection, eye, site not specified, congenital or intrauterine, organism not specified
 99 20 00 Inflammation, eye, site and type not specified (acute) (chronic) (subacute)
 99 20 00 Pus, eye, site not specified
 99 20 51 Allergy, site not specified, due to medicinal drops or ointment (atropine) (carbachol) (epinephrine) (eye) (lidocaine) (neosporin) (penicillin) (phospholine iodide) (pilocarpine) (xylocaine) (acute) (chronic) (subacute)
 99 20 52 Allergy, site not specified, other or NOS (acute) (chronic) (subacute) (vernal)
 99 20 52 Hay fever, site not specified (acute) (chronic) (subacute) (vernal)
 99 30 00 Ulcer, eye, site not specified (perforated)
 99 40 40 Abrasion, eye, site not specified
 99 40 40 Trauma, eye, site not specified, nonpenetrating. Includes: Abrasion, blunt trauma, concussion, erosion
 99 41 40 Trauma, eye, site not specified, cutting, lacerating, penetrating, or perforating
 99 42 40 Cinder, eye, site not specified, not specified if retained or removed (intraocular)
 99 42 40 Foreign body, eye, site not specified, not specified if retained or removed (intraocular) (metallic)
 99 42 49 Foreign body, eye, site not specified, retained (intraocular) (metallic)
 99 42 96 Foreign body, eye, site not specified, removed (intraocular) (metallic)
 99 43 40 Burn, site not specified NOS
 99 43 41 Burn, site not specified, chemical NOS
 99 43 42 Burn, site not specified, alkali (chemical)
 99 43 43 Burn, site not specified, acid (chemical)
 99 43 46 Burn, site not specified, radiation
 99 43 46 Burn, site not specified, physical
 99 43 46 Burn, site not specified, welder's (arc) (flash)
 99 43 46 Burn, site not specified, thermal
 99 43 46 Burn, site not specified, steam
 99 43 49 Burn, site not specified, powder (due to firecracker)
 99 50 00 Growth, eye, site not specified
 99 50 00 Tumor, eye, site not specified NOS
 99 53 00 Nevus, site not specified (benign)
 99 53 00 Tumor, eye, site not specified, benign
 99 55 00 Meningioma, sphenoid ridge
 99 56 00 Melanoma, site not specified
 99 56 00 Tumor, eye, site not specified, malignant
 99 59 00 Tumor, eye, site not specified, metastatic
 99 59 00 Tumor, eye, site not specified, secondary
 99 59 00 Ulcer, rodent, secondary in eye (maxillary) (sinus) (skin)
 99 65 00 Blood vessel broken, burst, or ruptured in eye
 99 65 00 Hemorrhage, intraocular
 99 65 00 Hemorrhage, eye, site not specified
 99 65 00 Rupture, blood vessel, eye, site not specified
 99 65 40 Hemorrhage, eye, site not specified, traumatic
 99 65 64 Hemorrhage, intraocular, due to hypertension
 99 66 00 Thrombosis, eye, site not specified (artery) (vein) (vessel)
 99 70 .. Visual field defect--See Defect, field
 99 70 00 Defect, field (visual)
 99 70 00 Hemianopia, Hemianopsia
 99 70 40 Defect, field, traumatic (visual)
 99 70 74 Defect, field, due to cerebrovascular accident (visual)
 99 70 76 Defect, field, due to meningioma, sphenoid ridge (visual)
 99 99 00 Disease, eye, site not specified, type specified NEC
 99 99 00 Drusen, site not specified
 99 99 74 Ischemic episodes, transient, affecting vision

*Codes for surgical and nonsurgical therapy were not used for HANES. History of surgical procedure was coded to postoperative state.
